

# SORDIN SUPREME ARC HEADBAND CONVERSION INSTRUCTION

## STEP 1

Free the headband cable that connects the two ear shells by removing the Velcro headband cloth.

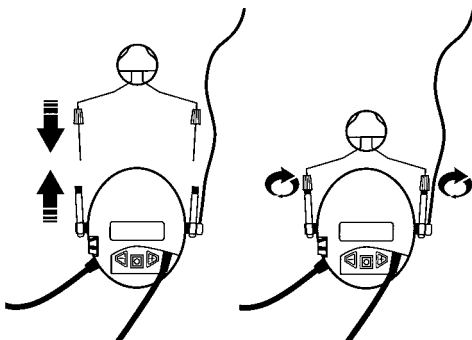

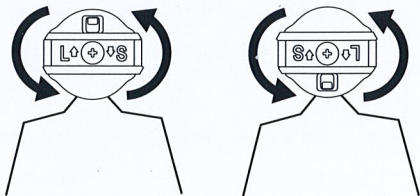

## STEP 2

Loosen the locking nuts on both left and right side and gently detach the headband from the connection points.

## STEP 3

Replace the headband, with the ARC rail attachments forks, and tighten the locking nuts again on left and right side, after adjusting it in correct height position.

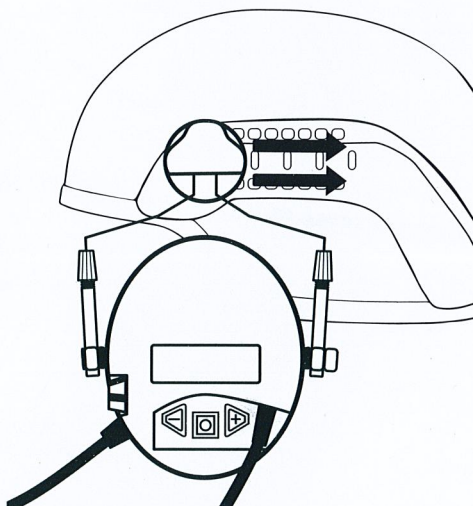

#### STEP 4

By turning the back plate and selecting the positions "S" or "L" (Small or Large) pressure can be adjusted and optimized to fit different head sizes and helmets.

#### STEP 5

Slide the backplate with dovetail into the rail on the helmet. This could be done from both ends. Center the backplate in the rail to cover the ears for best comfort and performance.
